

GoldenWolf is certified a Service-Disabled Veteran-Owned Small Business (SDVOSB), and Woman-Owned Small Business (WOSB). Our history demonstrates a broad range of strategic capital investment planning, enterprise-level management, analytics and modeling, and engineering and technical services.

- Service-Disabled Veteran-Owned Small Business (SDVOSB)
- Woman-Owned Small Business (WOSB)
- ISO 9001:2015 Certified
- Listed in the *Inc. 5000* as one of the fastest-growing companies in the U.S.

WHY GOLDENWOLF?

Our company provides managerial and technical support that includes portfolio management strategies, project management, policy development and training, data management, space management, sustainment, analysis and reporting, BUILDER SMS implementation and sustainment, and facility condition assessment services. We incorporate industry-accepted tools, such as Primavera P6, Microsoft Project, AutoCAD, SharePoint, and Teams, to manage our projects, keep up with schedules, and maintain records for timekeeping and financial reporting.

GoldenWolf has an established reputation for developing innovative, technology-forward, executable solutions for our clients and partners. Over the past 10 years, co-owners Sabrina Wolfersberger, PhD, and Ryan Bredahl have purposely built their team of experts to specialize in a unique set of core engineering, planning, and technology competencies. The company's current government clients include the USACE Huntsville, Mobile and Louisville districts, Naval Facilities Engineering Command (NAVFAC), and Veterans Health Administration (VHA) whereby GoldenWolf is supporting DHA, Army Medical Command (MEDCOM), Navy Bureau of Medicine and Surgery (BUMED), Army Installation Management Command (IMCOM), Marine Corps Installations Command (MCICOM), and Martinsburg, WV VA Medical Center (VAMC). GoldenWolf's vast experience includes both CONUS and OCONUS work, including project experience at the U.S. Naval Hospital in Okinawa, Japan (USNHO).

Additionally, GoldenWolf holds a Cooperative Research and Development Agreement (CRADA) with USACE's Construction Engineering Research Laboratory (CERL) to improve and refine the technology platforms used for facility condition assessments, asset management, and portfolio capital investment planning. These technology platforms include both the BUILDER Sustainment Management System (SMS) and Enterprise Sustainment Management System (ESMS), which are Department of Defense (DoD)-mandated and widely used by federal entities for portfolio management, condition forecasting, and capital investment requirements planning.
