

GOLDENWOLF

BUSINESS INTELLIGENCE & ANALYTICS

GoldenWolf, an 8(a) certified, Service-Disabled Veteran-Owned, Woman-Owned small business, is lean and flexible, but also highly experienced with both its relevant past performance and an excellent reputation related to business intelligence solutions. Our corporate approach to empowering enterprise program success is driven by our disciplined project management, proactive communication, and experienced multidisciplinary teams of engineers and analysts aligned with our clients' unique requirements.

DATA MINING & ANALYTICS

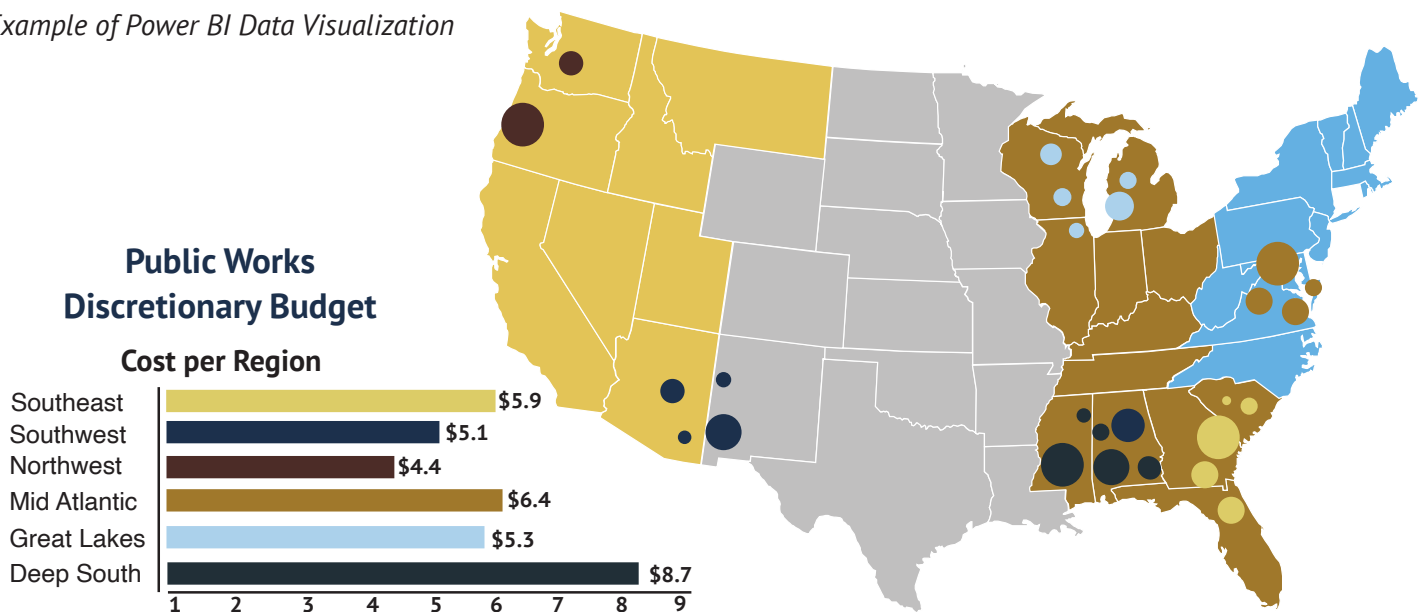

Data is the new corporate asset class. Extracting, transforming, and loading data, identifying patterns, and converting it to value at speed requires a team of skilled developers and data scientists.

GoldenWolf maximizes data preparation time for merging, cleansing, reshaping, and restructuring data sets to feed data mining algorithms. Our drag-and-drop data mining tools make it simple to apply intelligence to data, enrich it, and display it for in-depth analysis putting the power of data mining and analytics in the hands of all users across the business.

BUSINESS INTELLIGENCE & DATA VISUALIZATIONS

Data visualization needs vary across organizations. That's why GoldenWolf adapts to users' needs using business intelligence processes and software such as Tableau and Power BI to prepare and enrich data for consumption and data driven decision making. These tools power the entire analytics lifecycle from predictive modeling to reporting. Our strong business intelligence team makes it simple to go from raw unformatted data to reporting and dashboards – publishing and sharing interactive analytics for everyone inside and outside your organization.

Example of Power BI Data Visualization

The biggest challenge in data visualization is gathering and transforming data in the right format and shape to gain insights from your visualizations and dashboards. GoldenWolf's work enables anyone to visually and iteratively integrate and blend data from multiple sources and types – whether cloud-based or on premise, while native connectivity to Tableau and Power BI flows data into your data visualization seamlessly.

GoldenWolf currently provides real-time dashboarding and analytics for the Defense Health Agency, U.S. Army Medical Command, U.S. Navy Bureau of Medicine and Surgery, National Oceanic & Atmospheric Administration (NOAA), and other defense and federal clients.

Applying analytics and data quality standards to client challenges dramatically reduces reporting time and increase leaders' speed and confidence in making impactful decisions. Our goal is to help our clients achieve new insights, identify opportunities for innovation, and ultimately improve performance.

“

GoldenWolf's drag-and-drop data mining tools make it simple to apply intelligence to data, enrich it, and display it for in-depth analysis putting the power of data mining and analytics in the hands of all users across the business.

THE LATEST TECHNOLOGY

GoldenWolf's highly skilled analysts are adept in all industry leading software, including:

- *Tableau*
- *Google Data Studio*
- *Microsoft Power BI & Power Apps*
- *Secure & Customized Client Portals with real-time dashboard refresh sites*
- *SSRS (SQL Server Reporting Services)*
- *MS Access/Excel - Visual Basic Programming*
- *SQL Server Database Administration - Planning, Designing, Implementing, and Sustaining*

PROACTIVELY PROVIDING KEY METRICS

Using our advanced analytic methods, we provide clients with high-level expertise decision-making in capital expenditures, resource planning, performance measurement, and program evaluation.

Through our continued work with our federal clients, we understand the impacts of data sustainment on future budgets and program support and defense. Our expert staff excels at translating data, key metrics, and information into actionable and achievable recommendations.
